

Hi, I am S.May. I have worked in beautician trade for 20 years. Four years ago, I started to have blisters on my hand. They first appeared in my finger tips and got worse in winter time. Skin cracked , bled and caused lots of pain. I consulted medical doctors came with a diagnose of skin allergy and Dyshidrotic eczema. Blood tests show nothing abnormal. After taking western medicine, I got better. But the allergy reappeared when I stopped taking the medicine. Besides, the medicine made me dizzy and caused ringing in my year. I felt weaker.

I then went to consult a Chinese medicine doctor and was diagnosed to have eczema. The treatment was slow to show effect. Some Chinese medicine was too strong and caused hives to appear in the whole body.

At the beginning of 2014, on my friend's recommendation, I came to know Dr Yuen Wai Hong of House of Nature. I responded well to his treatment. Dr. Yuen also explained carefully in details my ailment and I came to understand more about Clinical IT and proper healthy eating habits.

Now I have got healed for my eczema. Thanks Dr. Yuen for his expertise. Very thankful.

Miss Suen
